InfoPersona

InfoPersona (A-C)

• Actively Retired - Many of these homeowners are retired, but some are still working, especially in blue collar fields and in nursing. This cluster contains married couples, dominated by empty-nesters. They enjoy spending their time on leisure activities such as reading, gardening, travel, fitness, and cooking from scratch.

• Adopters & Prosumers - College-educated married couples with children. This cluster contains many heads-of-household aged 40+. They enjoy staying home and playing with their toys, be it high-end electronics, low-end sporting equipment, or the latest tech gadgets.

• Coasting Through Life - Relatively high concentration of households along the North and South Atlantic coast, which helps explain the interest in saltwater fishing, golf, and high-end sporting equipment. Middle-aged homeowners, most married, most without children.

• Connected Couples - These households enjoy college sports and are tech-savvy, paying bills online and snatching up new gadgets as they hit the market. They have a higher than average interest in attending country music concerts. Here you will find many young, married couples without kids yet.

• Country Club Conservatives - While these households are not quite as high-earning as the previous cluster, they still earn hefty incomes. Households often consist of individuals with advanced degrees, most of whom are married with older children. A higher-than-usual proportion of households are Conservative or identify as Republicans. Homeowners who work at home remain a significant group.

• Coupon Club - College-educated older married couples with children who are either living at home while attending school or else soon-to-move out. Homeowners often work at home. They save money by clipping coupons and shopping at wholesale clubs, but may also enjoy hanging out at the country club and donating money to conservative causes. Many households often have a huge interest in pets.

• Creme de la Crème - These households bring home the largest paychecks. They are highly-educated homeowners, most often married with children living at home. A relatively big number of these people are self-employed. These households invest their money into timeshares and traditional investments. They enjoy traveling for vacations as well as sports such as golf and tennis.
InfoPersona (D-Z)

- **Enjoying the View** - Older, married empty-nesters; these homeowners have started thinking about life insurance, still have their taxes done by a CPA, and enjoy the comforts of Satellite TV services. Those who are not retired may be working from home in some capacity.

- **Fishing with Fido** - These homeowners love their animals. They enjoy outdoor activities like fishing and gardening. This cluster has a higher percentage of retired or soon-to-be-retired empty nesters. They tend to be more health-conscious and use vitamin and dietary supplements.

- **Gluten-Free Yuppies** - Single, young, highly-educated professionals renting apartments in larger cities (many located on the East Coast). They are jet-setting liberals who take advantage of the availability of specialty stores and adult education opportunities.

- **Left Turns and Straightaways** - Households who have many mixed interests from fishing to movies to pets to gardening. They also have varied levels of education. Members include a higher-than-usual proportion of NASCAR fans with a variety of relatively heavily-populated careers. Residences are usually occupied by married homeowners with children.

- **Portfolios & Passports** - College-educated older married couples without children (or else just empty-nesters) spend their freed-up money on foreign vacations, home improvement, and the stock market.

- **Safety Patrol** - This cluster contains married empty-nesters, but not likely to be retired yet. Slightly younger but less well-educated than their peers, they tend to show an interest in safety, security, life insurance and diet products.

- **Settling Down** - A mixture of married and single households, but generally without any children in the picture, although many couples may be planning on expanding their family soon. Many individuals display some tech savvy, have do-it-yourself enthusiasm, and are economically frugal. A disproportionately high number of these households call the Rocky Mountain area home.

- **World View** - This cluster is heavily populated by married, highly-educated, high-earners, but trends slightly younger, generally without children. This group of people still spends a lot of time traveling abroad, including heavy focus on traveling for business.
